Subject: Response Requested: WO# 1203001 Dimock - Final Report Review

Robin,

In the re-run packet for 1203001-12 there are some inconsistencies between the run log and the printouts.

QC Std 2 run at 12:33:29 was not included in the raw data
1203001-12 and 1203001-11 run the third time (12:23:05 and 12:28:30) is marked don't use on the run log but raw data does not indicate Don't Use.

Also for both packets - Uranium is on-demand - I didn't see Uranium included on the calibration log/prep log. Was this included in the mix? How was the low-level spike prepared? (I might just be missing this due to the form and the mixes.)

Cindy
